Let's make lifts better

Researchers at the British Columbia Institute of Technology have created an online survey to get feedback about your experiences using Stair Lifts, Enclosed Lifts and Unenclosed Lifts in Canada. Your contribution will be summarized in a report to the Canadian Standards Association (CSA) with recommendations for improvements to the standard (B355) which controls how wheelchair lifts are designed, installed, and maintained.

A picture tells 1000 words

As a part of the survey, you'll have an opportunity to submit videos or photos of you, using a lift to help us better understand the issues you describe in the survey. While not required for participation, your contribution of additional media to this affect would be greatly appreciated by the research team.

Win one of three
\$100.00 Pre-paid
Visa gift cards**

Who? Me?

We invite you to participate in this 15-20 min online survey if you:

- a) use a wheelchair or scooter as a means of mobility AND
- b) have experience using platform lifts in Canada
(does not include elevators or lifts in vehicles)

Sign me up!

Contribute to the survey by clicking the link or access through the QR code using your mobile camera app.
